

Warranty

Industrial Radio guarantees that any Midi Bass purchased from Industrial Radio is free from defects in workmanship and material for a period of 12 months from the date of purchase.

This warranty is not transferable and applies only to the original purchaser of the Midi Bass. Industrial Radio's obligation shall be limited to repairing or replacing the instrument as Industrial Radio deems appropriate.

The cost of freight and insurance is the responsibility of the purchaser.

This warranty is void on any Midi Bass that has been altered, or subjected to nonauthorised repairs; tampered with, or otherwise modified.

This warranty does not apply to damage that is likely to have been directly or indirectly caused, or contributed to, by the purchaser's careless, reckless or intentional acts or omissions.

This warranty does not apply where defects or damage have been directly or indirectly caused, or contributed to, by the instrument's exposure to extremes of humidity or temperature; or where the maintenance detailed below has not been followed.

While Industrial Radio takes all care with any instrument, it accepts no responsibility for any damage or alterations, unless those are proven to have occurred while the instrument was in Industrial Radio's possession.

Instrument Care

The Midi Bass frets must **NEVER** be cleaned or serviced using any steel wool, or other metallic based cleaning product. Using any such product will void the warranty.

The Midi Bass is constructed from quality timbers that have been dried and processed to withstand environmental extremes.

The Midi Bass can be adversely affected by continual exposure to extreme conditions such as heat, damp; and rapid temperature change. Such damage is not covered by warranty.

The Midi Bass painted finish should be maintained using a soft clean cloth with a non silicon based, quality, guitar polish.
